In communities worldwide, where children are born largely determines their educational outcomes and their opportunities in life, leaving millions of children without the knowledge and skills to become productive citizens. Join us for a conversation about the global problem of educational inequity and our experiences in addressing it.

Teach For All is a global network of 27 independent social enterprises that are working to expand educational opportunity in their countries by channeling the talent and energy of their most promising future leaders towards the cause. Teach For All works to increase and accelerate the impact of these organizations by providing central supports and fostering high-impact connections among their teachers, alumni, and staff. Visit TeachForAll.org for more information.
